

Chart-1 Birth Rate (With scrolltelling)

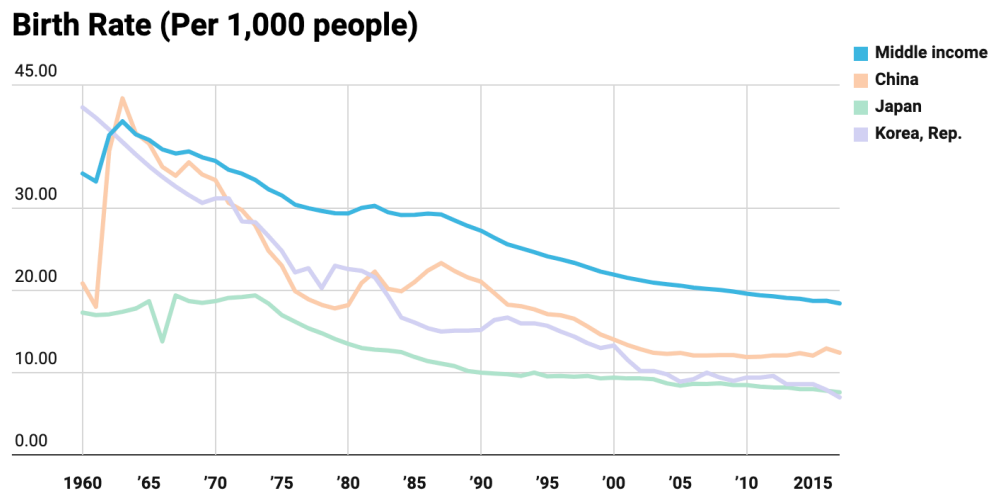

Chart-2 Aging Society – How many percentage of population above 65 years old

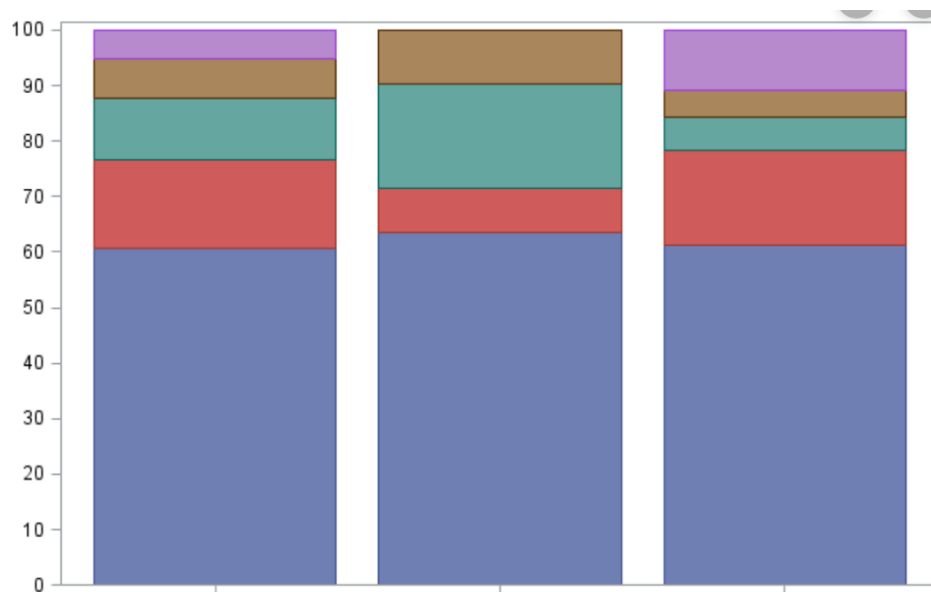

Chart-3 China's concern 1 – GDP per capital comparison with Japan and South Korea
(Not decided which kind of chart should be used, line chart already used in Chart-1)

GDP per capita per year (in US\$)

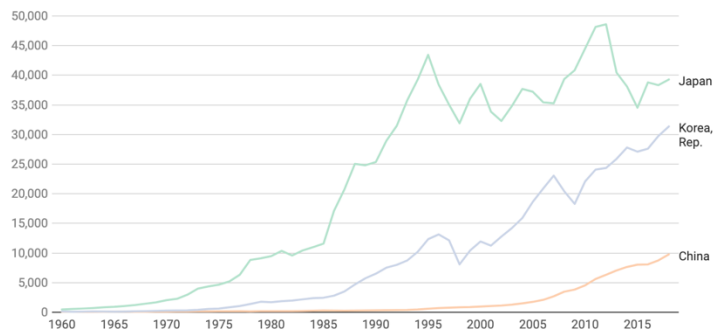

Chart 4 – China’s challenge 2 - How many retired people that each 100 working-age citizens are supporting. The number jumped 65% in China in last 20 years.

Plan to use icons to show the ratio in 1999 and 2018

Chapter 5 – reasons reluctant to have children – financial pressure is the main reason

Chinese families rising debt burden.
